ACADEMIC BACKGROUND

2009, Ph.D., Cellular and Molecular Biology, University of Texas at Austin

2002, Bachelor of Science, Molecular Biology, University of Southern Mississippi

RESEARCH EXPERIENCE

November 2015 – current, Assistant Professor; The University of Texas at Austin, Dell Medical School at the Dell Pediatrics Research Institute, Austin, Texas

October 2010 – October 2015, Post-doctoral fellow; Washington University School of Medicine, Developmental Biology, St. Louis, Missouri

- Research project: Genetics of vertebral column/spine defects using zebrafish as a model.
- Research supervisor: Lilianna Solnica-Krezel

July 2009 – October 2010, Post-doctoral researcher, Johns Hopkins School of Medicine, Center for Cellular Dynamics, Baltimore, Maryland

- Research project: Morphogenesis of primary mouse mammary gland organoids.
- Research supervisor: Andrew J. Ewald

2003 – May 2009, Ph.D. student; The University of Texas at Austin, Department of Cellular and Molecular Biology, Austin, Texas

- Research project: Diversity of Dishevelled genes and PCP effector genes on ciliogenesis.
- Research supervisor: John B. Wallingford

PERSONAL STATEMENT

Research interests in my laboratory focus on defining the processes that are essential for the development and homeostasis of the vertebral column or spine. We use cutting-edge genomic and genome editing approaches in both mouse and zebrafish model systems to identify the molecular genetics of these processes and model human spine disorder-associated loci. My lab combines i) animal models and cell culture, ii) multiple, modern imaging modalities, and other ‘omics data to gain a better understanding of the molecular genetics and pathogenesis of spine disorders. We developed mouse and zebrafish models of various musculoskeletal and spine disorders including models with direct relevance to human idiopathic or neuromuscular scoliosis. We have uncovered essential roles for signaling factors controlling dense cartilaginous tissue homeostasis as a key driver of idiopathic scoliosis. We have uncovered novel roles for the spinal canal motile cilia and the Reissner fiber in the development of neuromuscular type scoliosis. We have developed new transgenic tools for our global community including precision-edited genetic mutations, fluorescently tagged protein alleles, and enhancer-reporter lines labeling unique cellular and tissue structures, which have been requested and sent out across the globe. We will continue to use a multi-tiered approach, combining zebrafish, mouse, and cell culture models, informed by human genomic studies, with the goal to inform the early diagnosis of pediatric/musculoskeletal diseases and provide foundational knowledge of the genes and pathways involved in spine homeostasis.

AWARDS, HONORS, AND FELLOWSHIPS

2022	<i>Developmental Biology</i> - 2021 Outstanding Paper Award
2017	ORS Spine Section Early Investigator Podium Award
2013-2015	Standard Investigator Grant, Scoliosis Research Society
2015	14th International Phillip Zorab Symposium Best Poster Award, British Scoliosis Society
2012-2015	NRSA F32 Grant - 1F32AR063001-01
2011-13	Postdoctoral Fellowship Grant from the Children's Discovery Institute - MD-F-2011-143
2009	Best Talk Award – University of Texas at Austin Cell and Molecular Biology Retreat
2007, 2009	Society of Developmental Biology Travel Award
2006-2008	University of Texas at Austin Travel Award
2004	Joint Steering Committee for Public Policy Capitol Hill Day Travel
2002	Graduated with Honors University of Southern Mississippi
2001-2002	Dean's List University of Southern Mississippi
2001-2003	Beta Beta Beta Biological Honor Society

INSTITUTIONAL SERVICE ACTIVITIES

University of Texas at Austin

University Committees: Institutional Biosafety Committee (IBC) (Fall 2016 - current); Chair of UT Austin (2023- current); IBC Animal Resources Advisory Committee (Fall 2016 - current); Faculty Council Representative – C3 undergraduate Curriculum Changes Committee (2022-current).

Pediatrics Committees: Pediatric Research Committee (Fall 2016 - current); Pediatric Faculty Recruitment Committee (2017 - 2018).

Nutritional Sciences Committees: Assistant Graduate Student Adviser (2021-current); Nutritional Sciences Faculty Recruitment Committee (2019-2020).

Cell and Molecular Biology Qualifying Exam Committee (Q15): (2019-2022).

EXTERNAL SERVICE ACTIVITIES

Ad-hoc Reviewer - Grants

- Fellowships: Genes, Genomes, and Genetics (ZRG1 F08-L (20) 2024/05) (Feb/March 2024).
- NIH Developmental-2 (DEV-2) Study Section *ad hoc* reviewer (June 2023)
- External Reviewer Medical Research Council grant proposal MR/W02702X/1 “An integrated in vivo approach to advance genetic and therapeutic discoveries in bone diseases.” (November 2021).
- External Thesis Examiner for University of Otago “ Insights into spinal cord biology and its contributions to adolescent idiopathic scoliosis: From GWAS to animal models.” (July 2021)
- NIH Special Emphasis Panel/Scientific Review Group 2021 Skeletal Biology Structure and Regeneration (SBSR) *ad hoc* reviewer (June 2021).
- NIH Special Emphasis Panel/Scientific Review Group 2020 Skeletal Biology Structure and Regeneration (SBSR) *ad hoc* reviewer (June 2020).
- Dutch Research Council (NWO) | Domain Applied and Engineering Sciences (AES) *ad hoc* reviewer (2020).
- External Reviewer for the Research Grants Council (RGC) of Hong Kong (2017, 2019).
- External review committee for the Washington University School of Medicine Musculoskeletal Research Center Pilot & Feasibility grants (2018).

Science Meeting Organizer

- Planning committee for International Consortium for Spinal Genetics Development and Disease (2024).
- Organizer of the Southwest Society of Developmental Biology Regional Meeting (2022).
- Session co-chair Concurrent Session I: Muscular Skeletal and Connective Tissue The 16th International Zebrafish Conference 2021 Online.
- Planning committee for International Consortium for Spinal Genetics Development and Disease (2020).

- Organizing committee Southwest Society of Developmental Biology Regional Meeting 2021 Online.
- Session chair 9th Adhesion GPCR Workshop, Portland, OR (2018).
- Co-Organizer 2019 Orthopedic Research Society Annual Meeting Workshop on Zebrafish: An Emerging Model for Orthopedic Research.

Ad-hoc Reviewer - Manuscripts

Nature, Nature Genetics, Human Molecular Genetics, Plos Genetics, ELife, Nature Communications, Developmental Biology, Developmental Dynamics, Human Mutation, PlosONE, Biological Review, Bone, Differentiation, Science Bulletin, Connective Tissue Research, Journal of Orthopedic Research, Genetics, Journal of Bone Mineral Research, Human Genome Variation, Scientific Reports, European Spine Journal, Journal of Human Genetics, Disease Models and Mechanisms, Bone, Biological Reviews, Open Biology, iScience, Frontiers in Endocrinology, and Journal of Orthopedic Research.

PROFESSIONAL SOCIETIES

2018-current, Adhesion-GPCR Consortium

2018- current, International Zebrafish Society

2016-current, Orthopedics Research Society, Spine Section (ORS)

2005-current, Society of Developmental Biology (SDB)

2013-current, International Consortium for Spine Genetics, Development, and Disease (ICSGDD).

2022-current, American Society of Bone and Mineral Research (ASBMR)

MISC. POSITIONS

2001-2001, Field Research USGS, Alagnak River Basin, AK, Julie Meka, Native Trout Program Coordinator

2001-2003, Microbiology Lab Assistant, Microbiology lab, University of Southern Mississippi, Delia Anderson, Professor

2002-2003, Undergraduate Research, University of Southern Mississippi, George Santangelo, Professor

TEACHING EXPERIENCE

Microbiology Laboratory - The University of Southern Mississippi

Clinical Microbiology Laboratory - The University of Texas at Austin

Developmental Biology - The University of Texas at Austin

Nutritional Sciences Lab (NTR 126L) - Fall 2019; Spring/Fall 2020, Spring/Fall 2021 - The University of Texas at Austin

2013, British Scoliosis Research Foundation International Phillip Zorab Symposium, London, UK, “*The Druk insertional mutant zebrafish, a model for adolescent idiopathic scoliosis*”. Selected speaker.

2013, British Scoliosis Research Foundation International Phillip Zorab Symposium, London, UK, “*Early loss of col8a1 function in zebrafish results in the dysmorphogenesis of vertebral bodies and scoliosis*”. Selected speaker.

2012, Molecular Pathways in Organ Development & Disease, Cold Spring Harbor, NY, “*The Druk Insertional Mutant Zebrafish, a Model for Adolescent Idiopathic Scoliosis*”. Selected speaker.

2010, Society of Developmental Biology Mid-Atlantic Meeting, Baltimore, MD, “*Dynamic regulation of cell motility and adhesion during mammary branching morphogenesis*”. Selected speaker.

POSTER PRESENTATIONS

2022, American Society of Bone and Mineral Research 2022 Annual Meeting. Austin, TX. “*Dysregulation of SOX9 Function in the Pathogenesis of Adolescent Idiopathic Scoliosis*”.

2019, 78th Annual Society of Developmental Biology Meeting. Boston, MA. “*Regulation of terminal hypertrophic chondrocyte differentiation in Prmt5 mutant mice modeling infantile idiopathic scoliosis*”.

2107, Inaugural Musculoskeletal Regenerative Medicine and Biology: From Development to Regeneration, St. Louis, MO, “*GPR126 is Required for Homeostasis of the Intervertebral Discs and Synovial Joints in Mouse*”.

2015, 14th International Phillip Zorab Symposium, Edinburgh, UK, “*Specific loss of Gpr126 in osteochondroprogenitor cells of the mouse models’ adolescent idiopathic scoliosis and pectus excavatum*”.

2013, Aquatic Animal Models for Human Disease and Midwest Zebrafish, Milwaukee, WI, “*Investigations of early and late onset scoliotic curvatures in zebrafish*”.

2011, Society of Developmental Biology 70th Annual Meeting, Chicago, IL, “*Investigations of early and late onset scoliotic curvatures in zebrafish*”.

2009, Society of Developmental Biology, 68th Annual Meeting, San Francisco, CA, “*The PCP effector protein Fuzzy is essential for targeted membrane trafficking, ciliogenesis, and mouse embryonic development.*”

2008, Society of Developmental Biology. Southwest-Gulf Regional Meeting, Houston, TX, “*Distinct expression patterns and developmental functions of Dishevelled in Xenopus.*”

2007, Society of Developmental Biology, 66th Annual Meeting/1st Pan American Cong Dev Biol, Cancun, Mexico, “*Distinct expression patterns and developmental functions of Dishevelled in Xenopus.*”

2006, Society of Developmental Biology. 65th Annual Meeting Meeting, Ann Arbor, MI, “*Subcellular localization and signaling properties of Dishevelled during Xenopus development.*”

2002, Yeast Genetics and Molecular Biology Meeting, Madison, WI, “*The effects of glucose concentration on Saccharomyces cerevisiae in ΔGcr1 and ΔGcr2 backgrounds*”

PRE- and POST-DOCTORAL TRAINEES

Brittany Voigt – 2021- current - Cell and Molecular Biology/ILS.

Ganga Tandukar – 2021 – current – Nutritional Sciences.

Valeria Aceves – 2021 – current – Nutritional Sciences.
2021 CNS Dean's Strategic Fellowship

Zhaoyang Liu (postdoc, 2016-2022)
F32 NRSA awardee (AR073648)
K99 awardee (AR077090).
Currently – Asst. Professor – Univ. of Southern California.

Mia Konjikusic (UT-Austin, MBS graduate student, 2017-2021)
Currently – Post-doc Jeremy Reiter lab UCSF Spring 2022

Ben Troutwine (postdoc, 2017-2020)
Currently – Senior Research Associate at University of Kansas Medical Center

Yunjia Wang (UT-Austin, China Scholarship Council Fellow, 2019-2021).
Currently – Surgical resident - Department of Spine Surgery and Orthopedics, Xiangya Hospital, Central South University, Changsha, China.

UNDERGRADUATES MENTORED

Melisa N. Bayrak – 2020-2022 - currently Medical School - University of Texas Health Science Center.

Holden S. Archer – 2018-2020 - currently Medical School - UT Southwestern Medical School.

Siyu Xiao – 2018-2019 - currently Graduate Studies - University of Houston

Roberto Gonzalez – 2015-2017 - currently Medical School - UT Southwestern Medical School.

STUDENT DISSERTATION COMMITTEES

Tim Kuka - Eberhart lab - The University of Texas (2017-2021).

Mia Konjikusic - Gray/Wallingford labs - The University of Texas (2018-2021).

Janani Ramachandran - Vokes lab - The University of Texas (2018-2021).

Scott K. Tucker – Eberhart lab – The University of Texas (2021).

GRANT SUPPORT

Pending:

- NIH/NIAMS, 2R01 AR072009-06, PI Gray, "Investigations of the molecular genetics and pathogenesis of scoliosis." (Submitted March 2022) \$2,615,000 (5-year budget).
- NIH/NICHD, 2P01-13433299, Multi-PI Wise, Ahituv, and Solnica-Krezel with Subaward to Gray "Developmental Mechanisms of Human Idiopathic Scoliosis." (Pending council, scored 23rd percentile) \$125,000 to Gray (5-year budget).

Ongoing

- NIH/NIAMS, R01 AR072009-01, PI Gray, "Towards a Mechanistic Understanding of Adolescent Idiopathic Scoliosis." (Impact Score:14, Percentile:1) \$1,721,500 (5-year budget).

Completed

- UT Austin CNS Catalyst Grant Program, Vokes and Gray, "PRMT5-dependent Regulation of Articular Cartilage Homeostasis and Osteoarthritis." \$50,000.
- NIH/NIAMS, R01AR068292-05, PI Hadley-Miller, Sub-PI, Gray, "Familial idiopathic scoliosis: gene discovery and functional studies" \$1,720,500
